## Bosch Rexroth's BC Facility Closure and Relocation

### **Bosch Rexroth continues its strong role and commitment to support customers in BC and rest of Western Canada!**

Bosch Rexroth Canada recently closed the Port Coquitlam facility as part of a larger North American and Global transition to work more closely in collaboration with Authorized Distribution Partners by eliminating the duplication of resources and improving access to world class service. To that end Norcan Fluid Power, Bosch Rexroth's Western Canada authorized distributor will assume all BC service support activities commencing Feb 1st 2020. This transition is part of the BC strategy to further strengthen our service business and to more effectively support all customers in BC. The local BC Bosch Rexroth team of Account Development Managers (ADM's) remain active and available and will continue to serve you with a particular focus on delivering value added solutions for your drive and control needs.

[Norcan Fluid Power](#) with its multi-branch footprint provides greater access to expanded service offerings, greater access to Bosch Rexroth products, technical support and application expertise. [Norcan](#) is well positioned with local inventory and service out of eight (8) locations in Western Canada, three (3) of which are located in the BC communities of Langley, Kamloops and Prince George.

Should you have any questions or concerns relative to our BC regional support or service, please contact us right away:
