Bosch Rexroth and Indramat: A legacy of innovation

Acquired by Rexroth in 1965, the Rexroth Indramat brand became known for innovative, reliable and long-lasting technology. In 2001, Robert Bosch GmbH acquired Rexroth, including its Indramat business, which was merged with the existing Bosch Controls product group to form the Electric Drives and Controls Technology Group under Bosch Rexroth.

Bosch Rexroth's commitment to support this technology continues to this day—and that support includes a range of retrofit and modernization options to help take your drives, motors and controls systems into the next generation.

Replace and upgrade Indramat products

When it's time, Bosch Rexroth can provide you with a custom designed drive, motor and controller upgrade plan that most effectively and efficiently replaces your older Indramat equipment with state-of-the-art IndraDrive drives, servo motors, high performance IndraControl controllers, and IndraMotion MLC, MLD and MTX PLC platforms.

Risk versus Reward: Factory Authorized Service and Repairs is the only way to go

When you use Bosch Rexroth to repair Indramat products, you eliminate the risk that would otherwise create potential safety hazards for your workers and equipment, which can cause unplanned and costly machine downtime and shorten equipment life cycle.

With Bosch Rexroth, you have immediate access to genuine Indramat spare parts as well as factory-trained technicians certified to complete repairs and return your equipment to like-new condition. Service and repairs are guaranteed by Bosch Rexroth certified technicians and backed by the Bosch Rexroth factory guarantee.

Options for Indramat Products:

We offer a range of service, repair and retrofit options for legacy Indramat products. Each option is designed to help you satisfy your operational and budget needs.

Standard Repair:

Corrects the problem and updates the repaired equipment to the latest technical revision, replacing any failed components with new genuine Bosch Rexroth Indramat components; one-year factory warranty and fast responses (incl. same-day, one, two or ten business days turnaround).

Reman/Overhaul:

Corrects the problem, updates the repaired equipment to the latest technical revision, and replaces all wearing components such as fans, relays, power semiconductors and capacitors; two-year whole product warranty.

Field Service:

Arranges prompt on-site Indramat troubleshooting and replacements, with factory-trained technicians offering genuine Bosch Rexroth Indramat spare parts

Long life Service:

Guaranteed extension of product support for seven years beyond published end-of-service date.

Full or Partial Retrofit:

Establishes strategic plan and solution to support installed Indramat products well beyond end-of-service and Reman dates.

Spare Parts Options:

We supply spare parts for Indramat products or if no longer manufactured, we can provide options for replacement.

Service Contracts:

Protect your systems and manufacturing uptime with service contracts that include fitness checks, scheduled maintenance, parts replacement and defined response times for repairs and field service.

Please contact us today:

Arrange an appointment with our Aftermarket Service Consultant to discuss Indramat Service options best suited to your needs.
