move?

Rexroth  
Expertise.

Production Up-time  
Planning Program  
(PUP)

## Why Service from Rexroth?

- Industrial and mobile hydraulics
- Expertise in CNC, PLC's, Motion Control, Resistance Welding, Tightening Technology, Linear Motion, Drive and Motor Solutions, Conveyor Systems, Hardware and Software
- Available 24/7
- One point contact for field service, spare parts and repairs
- Fast responses
- Factory trained technicians
- Genuine spare parts for repairs
- Customized service
- Global support and service
- Industry wide applications expertise
- Service contracts
- Exchange programs
- Product training

Rexroth offers a complete range of innovative drive and control solutions backed up by in-depth expertise and best-in-class service portfolio, including:

- Design
- Engineering
- Manufacturing
- Commissioning
- Field Service
- Repairs
- Upgrades & Retrofits

## Production Up-time Planning Program (PUP)

Our technical professionals are at your side to provide support and advise in every phase of the product and machine lifecycle.

Our Production Up-Time Planning Program will help you plan for preventative maintenance to avoid costly down-time and to minimize potential production losses. And our detailed documentation from a certified Rexroth consultant, ensures that you have addressed and met all of the maintenance service requirements to keep machinery running problem-free.

Bosch Rexroth's (PUP) program is there to support your requirements through the "Complete life cycle of equipment". We work with you to identify high risk areas of your manufacturing equipment that utilize Bosch Rexroth products. We will identify components that are no longer available, longer lead time items, and/or require regular proactive servicing.

Once these areas/components have been identified, we will work together with you to create a plan that will minimize/eliminate unscheduled production downtime; whether it's stock holding, scheduled service or retrofits.

# Genuine Rexroth Parts

Precision engineered for  
performance

Bosch Rexroth's Back to New service and repair program ensures that you are always utilizing genuine Rexroth manufactured parts. A quality standard, performance and reputation that comes from the world class engineering and manufacturing expertise of Bosch Rexroth. Accepting anything less is risking degraded performance, shortened operating life and future headaches.

Sure parts may look identical, but there is a world of difference in the performance of genuine Rexroth parts.

Genuine Rexroth parts are not available from anyone other than Rexroth or Rexroth Authorized Solutions Partner.

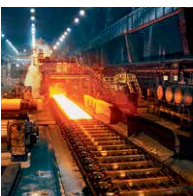

# Genuine Rexroth Service

Expertise for reliable  
productivity

Preventive maintenance, on-site inspections, and reliable service are the best ways to avoid costly downtime, to maximize productivity, and to extend the life of equipment. Genuine Rexroth service gives you fast access to the best field service engineering team in the industry. Services range from project management and equipment commissioning to problem troubleshooting and diagnosis. We can even help you pinpoint problems not caused by Rexroth products, such as mechanical problems, electrical malfunctions, or process shortcomings.

Whether your needs are on the factory floor or at a remote jobsite, genuine Rexroth service is your global source for fast, reliable on-site support.

Ask us about our remote monitoring services which provide the added reliability and assurance for remote machinery diagnosis.

# Genuine Rexroth Repairs

Back to original factory  
standards

Count on genuine Rexroth repairs to return products back to factory-new condition.

From initial inspection to delivery of repaired products with a new warranty, we have the knowledge, skills and facilities to bring any repaired product back to original factory specifications.

For minor repairs or for major overhauls, we use genuine Rexroth repair components to ensure highest quality performance.

Please keep in mind that any repairs to Rexroth products other than by Bosch Rexroth or Authorized Service Partner voids the Rexroth manufacturer warranty.

# Genuine Indramat Support

Replace & upgrade  
Indramat products

**Bosch Rexroth is the only authorized facility for factory certified service, repairs and spare parts for Indramat products.**

We offer a range of service, repair and retrofit options for legacy Indramat products. Each option is designed to help you satisfy your operational and budget needs. We can provide you custom designed drive, motor and controller upgrade plan that cost effectively and efficiently replaces your older Indramat equipment with state-of-the-art IndraDrive drives, servomotors, high performance IndraControl controllers, and Indramotion MLC, MLD and MTX PLC Platforms.

**Our support: Standard Repair, Reman/Overhaul, Field Service, Long Life Service, Full or Partial Retrofit, Spare Parts Options and Service Contracts**

**Contact us today: 1-855-REXROTH**

# Genuine Options for Hägglunds Marathon Motors

## Proactive Marathon Incentive Service/Repair Program

**Hägglunds Marathon motors are no longer being produced, so now more than ever, it is necessary to protect your investment. There are options available.**

The Bosch Rexroth service team can still repair your motors and provide an “as new” factory warranty with each repair. We can also provide a cost effective, proactive solution for Drive and Control systems specific to your requirements. By registering with us in advance, we will be able to connect with you to discuss your application, uptime requirements, and proactive activities that can minimize reliability risk. In the event something should happen to your Marathon Motor, we will already have a program and solution in place to get you up and running as quickly as possible.

**To register, contact: 1-855-REXROTH or email us at [service@boschrexroth.ca](mailto:service@boschrexroth.ca)**

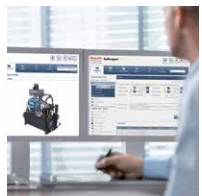

# Genuine Rexroth Training

The value of real  
knowledge

For both machine designers and end users, genuine Rexroth training provides you with the knowledge on how to configure and use our products.

From designing to installing and maintaining control systems, our training stresses hands-on experience, practical exercises, and uses traditional and new educational technologies.

Learn how to get the most out of Rexroth products – and how to keep them up and running productively.
